## Part One

Economic Developments of Iran in 2007/08

> In the Name of God,
> The Compassionate, The Mercifur

## Introduction

During 1386 (2007/08), Iranian economy was stable and smooth. Sharp rise in prices and acceleration of inflation was a foreseeable phenomenon which was realized. In spite of higher inflation, other major real sector indicators like GDP growth and unemployment rate, did not manifest major changes from medium-term trends.

Other major development in Iran's economy in 2007/08 was the government's revision of the expansionary fiscal policy which resulted in change of sources of liquidity expansion. Consequently, the build-up of foreign reserve assets in Central Bank's balance sheet which was the main source of liquidity growth for many years was substituted by build-up of Central Bank
claims on banks. The sharp rise of banks indebtedness to Central Bank in the said year compelled the monetary authority to gradually restrict banks' access to Central Bank's funds and resulted in CBI's demand for observing more discipline by banks in their credit and lending operations.

On the fiscal front, the overall assessment of the implementation of government budget in 2007/08 was government's major efforts to raise tax and non-tax revenue as well as reducing the budget dependence on oil income. On the expenditure side of government budget, major endeavors were directed towards the containment of current expenditure and the attainment of a higher and more acceptable realization of acquisition of the non-financial assets. Meanwhile, the major aim of the government was to manage current and capital expenditures in a way that the total approved government expenditure remains unchanged.

Favorable developments in the global crude oil market in tandem with the rising trend of non-oil exports brought about the positive development in the external sector. However, intensification of the sanctions imposed on the Iranian agents and organizations, especially Iranian banks, and their limited access to conventionally international banking and financial instruments decelerated foreign financing and raised import costs, which in turn increased reliance on domestic resources for financing imports. Thus, capital and financial accounts deficit rose in the review year, and a large portion of country's foreign exchange revenues was allocated for financing imports through cash transfers.

## National Income

Based on preliminary estimates, gross domestic product at current prices rose from Rls. 2,038 trillion in 2006/07 to Rls. 2,623 trillion in 2007/08, showing 28.7 percent growth in nominal terms and 6.9 percent growth in real terms, which indicates 0.7 percentage point increase at constant prices compared with the previous year. Meanwhile, non-oil GDP registered 7.6 percent growth, up by one percentage point compared with 2006/07.

According to preliminary figures, "agriculture", "construction", "transport, storage, and communication", and "social, personal, and household services" groups had the greatest contribution to the economic growth in 2007/08. The share of the value-added of "agriculture" group in GDP was 0.9 percentage point, "oil" 0.1 percentage point, "manufacturing and mining" 2.7 percentage points, and "services" 3.5 percentage points.

Based on preliminary estimates, in 2007/08, private consumption expenditures grew by 9.1 percent at constant 1997/98 prices, while public consumption expenditures declined by 4.3 percent. This reduction was mainly attributable to the adoption of contractionary policies in government general budget. Comparing expenditure growth figures of 2007/08 with those of the previous year is indicative of a rise in the growth rate of private consumption expenditures and a fall in that of public consumption expenditures.

In 2007/08, gross fixed capital formation indicated 2.1 and 12.8 percent growth in machinery and construction, respectively, at con-
stant prices. For construction, this increase was due to the growth in private sector investment in this sector. The decelerating growth of capital formation in machinery is attributable to a decline in the imports of capital goods. The overall gross fixed capital formation grew by 6 percent in 2007/08, indicating an increase when compared with the 3.3 percent of the previous year.

Figure 1. Contribution to GDP growth

## Agriculture

Based on preliminary estimates, the value-added of the agriculture sector grew by 6.2 percent in 2007/08, showing a rise when compared with the 4.7 percent growth of the previous year. The review year witnessed remarkable growth in the production of farming, horticultural, and livestock products. This was mainly attributable to increased and well-distributed rainfall as well as rise in banking facilities and government budget resources allocated to this sector.

In 2007/08, total precipitation level amounted to 458.3 billion cubic meters ( 278.1 mil-
limeters) ${ }^{(1)}$, showing 12 percent growth compared with the long-term average and 30 percent increase compared with 2006/07.

According to preliminary data released by the Ministry of Agriculture Jihad, total farming and horticultural product was estimated at 90 million tons for the farming year of 2007/08, showing 3.6 percent growth compared with the previous year. Of this amount, 73.5 million tons were farming and 16.5 million tons, horticultural product, which showed respectively 3.1 and 6.1 percent growth compared with the previous year. Total livestock products (excluding honey) were 11,349 thousand tons, up by 7 percent compared with the previous year.

Production of major crops including wheat, barley, and rice (paddy) grew by 8.3, 5, and 28 percent, respectively, compared with 2006/07. This raised the total production of cereals by 11.4 percent to 25 million tons. Implementation of wheat self-sufficiency plan and the support policy for the guaranteed purchase of wheat have contributed to the increasing growth of wheat production over the recent years.

At the end of 2007/08, the total outstanding facilities (net) extended by banks and credit institutions to the agriculture sector amounted to Rls. 208.6 trillion. This indicated 36.2 percent growth compared with the previous yearend. Of this amount, 48 percent were extended by Bank Keshavarzi (Agriculture Bank) and 51.9 percent by commercial banks. In this year, the share of the agriculture sector in total out-
(1) Ministry of Energy, Iran Water Resources Management Company, Monthly Precipitation Report, August 2007
standing facilities (net) extended by the banking system was 14.1 percent.

The total amount of facilities extended by Bank Keshavarzi was Rls. 55,413.5 billion by the end of 2007/08, up by 4.7 percent compared with the previous year. Of total credits paid by this bank, 80.3 percent were from nonstatutory resources and the remainder from budget law notes, administered funds, and contracts, showing 9.4 percent increase and 10.9 percent decrease, respectively, compared with 2006/07.

According to the Treasury General, in 2007/08, acquisition of non-financial assets (development expenditures) for development of "agriculture and natural resources" and "provision of water resources and establishments" amounted to Rls. 7,600.8 billion, down by 35.2 percent compared with 2006/07. Meanwhile, the guaranteed purchase price of various farming crops increased up to 50 percent.

By the end of 2007/08, Insurance Fund for Agricultural Products insured 1,725 thousand persons active in "farming and horticulture", "livestock and poultry ", "aquaculture," "silkworm raising", and "natural resources" sub-sectors, indicating 3.4 percent fall compared with the previous year.

In 2007/08, 273 thousand tons of agricultural goods, valued at Rls. 772.6 billion, were traded on the Agricultural Stock Exchange. Agricultural goods offered and traded on the Agricultural Stock Exchange in this year included corn, barley, soybean meal, sugar, rice, pistachio, raisin, sugar beet residue, feed wheat, and wheat bran.

## Energy

In 2007, world primary energy consumption ${ }^{(1)}$ grew by 2.4 percent to 11.1 billion tons oil equivalent. Of this amount, 10.4 billion tons oil equivalent was consumed by non-OPEC and 0.7 billion by OPEC Member Countries. The highest amount of consumption was related to

[^0]oil by 35.6 percent and the lowest to nuclear energy by 5.6 percent. Iran's primary energy consumption amounted to 182.9 million tons oil equivalent, up by about 1.8 percent. Oil and natural gas are the primary energies consumed largely by Iran, while other energies are consumed sparingly.

In the review year, world crude oil production reached $81.5 \mathrm{mb} / \mathrm{d}$, showing 0.2 percent reduction compared with 2006. Crude oil production by OPEC Member Countries, accounting for 43.2 percent of world crude oil production, decreased by 1.0 percent to 35.2 $\mathrm{mb} / \mathrm{d}$. World crude oil consumption, however, grew by 1.2 percent to $85.2 \mathrm{mb} / \mathrm{d}$.

In 2007, besides rising demand, a host of factors such as changes in inventory levels of crude oil and gasoline in the US, depreciation of US dollar against other hard currencies, shortages of refining capacity, political and military tensions in the Middle East and Nigeria, and continuation of Iran's peaceful nuclear issue were responsible for run-up in crude oil prices. In this year, the average price of each barrel of OPEC crude oil basket ${ }^{(2)}$ reached $\$ 69.05$, up by 11.3 percent.

OPEC, in its December 2006 Conference, approved its production cut of 500 thousand b/d, effective as of February $1^{\text {st }}$, 2007. The Conference held on September $11^{\text {th }}$, 2007, decided to increase the volume of crude supplied to the market by OPEC Member Countries (excluding Iraq and Angola) by 500 thousand b/d, effective
(2) Includes eleven types of crude oil: Arab Light (Saudi Arabia), Basra Light (Iraq), BCF 17 (Venezuela), Bonny Light (Nigeria), Es Sider (Libya), Iran Heavy (Islamic Republic of Iran), Kuwait Export (Kuwait), Qatar Marine (Qatar), Minas (Indonesia), Murban (UAE) and Saharan Blend (Algeria).

November $1^{\text {st }}, 2007$. This decision was taken to maintain oil market stability. At its $146^{\text {th }}$ Meeting in Abu Dhabi, on December $5^{\text {th }}$, 2007, OPEC agreed to keep output levels unchanged. Additionally, the group assigned production quotas to recently joined members, Angola and Ecuador.

Iran's average crude oil production, in adherence to the production quotas set by the OPEC, amounted to $4.1 \mathrm{mb} / \mathrm{d}$ in 2007/08. Crude oil exports increased by 2 percent to $2.5 \mathrm{mb} / \mathrm{d}$; however, exports of oil products plummeted by 25.2 percent to 199 thousand b/d compared with the previous year. The average spot price of Iran's crude oil export grew by 30.9 percent to about \$78.04.

Electricity generation amounted to 203.8 billion kWh, up by 5.9 percent compared with the previous year. Of total generated electricity, 190.2 billion kWh ( 93.3 percent) was generated by power plants affiliated to the Ministry of Energy and 13.6 billion kWh ( 6.7 percent) by other institutions. In this year, the highest amount of electricity ( 91.1 billion kWh ) was generated by steam power plants while diesel power plants accounted for the lowest amount of generation

Figure 5. OPEC members' quotas in 2007

( 0.2 billion kWh ). Meanwhile, the highest growth in generation of electricity belonged to gas and combined cycle power plants by 9.3 percent; however, the amount of electricity generated by hydroelectric power plants showed 1.7 percent decline.

In 2007/08, consumption of electricity rose by 5.8 percent to 155.6 billion kWh . The highest growth of consumption belonged to street lighting by 12.1 percent. Electricity consumption by commercial sector grew by 9.1 percent, industrial 8.7 percent, public 5.7 percent, and residential 4.9 percent. Consumption of electricity by agriculture sector fell by 1.2 percent. Residential and industrial sectors had the highest shares in the consumption of electricity by 33.6 and 31.8 percent, respectively.

## Manufacturing and Mining

According to preliminary estimates, manufacturing and mining sector exhibited a relatively favorable growth of 8.7 percent in 2007/08. The value-added for manufacturing and mining sectors were estimated at 8.3 and 17.7 percent, respectively. Of special note is that, according to
the $4^{\text {th }}$ FYDP Law, the Plan target for manufacturing and mining sectors was 11 percent. The growth rate in production of petrochemicals by 32.7 percent, and growth in production of construction materials (due to remarkable growth of supply in housing sector), and also mineral products such as copper ore and iron ore, by respectively 22.7 and 18.5 percent, contributed to the realization of high growth in manufacturing and mining sectors.

In the review year, production of cold coil grew by 31.4 percent, refrigerators and freezers 20.8 percent, plate glass 20.4 percent, washing machines 20.0 percent, cement 13.5 percent, steel products 9.7 percent, porcelain tiles 7.4 percent, crude steel 3.1 percent, and passenger cars 2.7 percent compared with the previous year.

According to the Ministry of Industries and Mines, 8,135 operation permits were issued for new manufacturing establishments and expansion of existing units, up by 20.3 percent compared with the previous year. Required investment and job opportunities based on operation permits increased by 68.1 and 14.6 percent, respectively. Per capita investment based on operation permits was Rls. 1.8 million. The highest per capita investment was related to the province of Markazi by Rls. 14.7 million and the lowest to Sistan and Baluchestan by Rls. 0.14 million. The ratio of the highest to lowest per capita investment is 105.3 times, pointing to the existence of a wide gap of industrial investment in provinces.

In this year, the Ministry of Industries and Mines issued 48.2 thousand establishment permits for the establishment of new manufac-
turing units and the expansion of existing units, showing 11.3 percent reduction compared with the previous year. Of the factors responsible for reduction in the number of establishment permits was the obligation to submit a feasibility report to general departments of the Ministry of Industries and Mines in some provinces. The amount of investment required for the establishment of the mentioned units and job opportunities created (in case of operation of manufacturing units) grew by 12.2 and 1.3 percent, respectively, compared with the previous year.

Figure 6. Investment and employment growth rates based on operation permits issued for manufacturing establishments

The outstanding facilities extended by banks and credit institutions to the manufacturing and mining sector grew by 22.8 percent to Rls. 383.1 trillion, compared with end-2006/07. The outstanding facilities extended to the public manufacturing and mining sector declined by 49.1 percent and facilities extended to the nonpublic manufacturing and mining sector increased by 27.4 percent. This is indicative of the banking system's orientation towards reduction of government undertakings and private sector encouragement to further participate in economic activities.

Based on the data released by the Treasury General, government development expenditures in the form of credits for the acquisition of non-financial assets in the manufacturing and mining sector and industrial research project amounted to Rls. 2,546 billion in 2007/08, down by 6.2 percent. These expenditures fell by 19.7 percent to Rls. 615.7 billion, at constant 1997/98 prices. Out of the approved figure for acquisition of non-financial assets (Rls. 3,207 billion), only 79.4 percent was realized.

According to the Ministry of Industries and Mines, 198 projects worth $\$ 3.8$ billion were approved to be financed out of the OSF. Chemical and cellulose products, with 58.8 percent share in approved facilities ( $\$ 2.2$ billion), ranked first among major manufacturing and mining groups.

The producer price index in the two sectors of manufacturing and mining reached 349.2 and 288.4, showing 15.4 and 7.6 percent growth (at constant 1997/98 prices), lower than PPI's general index changes at 16.8 percent.

Share price index of manufacturing companies (industrial index) increased by 2.8 percent at end-2007/08 compared with end-2006/07. Tehran Stock Exchange Dividend and Price Index (TEDPIX) advanced by 17.6 percent. Meanwhile, 6.4 million tons of metal products, valued at Rls. 58 trillion, were traded in the Commodities Exchange. Steel products accounted for 72.8 and 94.8 percent of the value and weight of metal products traded in the Commodities Exchange.

Industrial exports reached 21.9 million tons in terms of weight and $\$ 11.6$ billion in terms of value, indicating 13 and 20.1 percent growth,
respectively, compared with the previous year. In this year, the share of industrial exports in total non-oil exports reached 68.1 and 75.8 percent in terms of weight and value, respectively.

## Construction and Housing

Rebound in housing market which had started in the second quarter of 2006/07 in urban areas, ran into 2007/08, and boosted construction activities. The noticeable growth in private sector investment in new buildings in urban areas (at current prices), by 80.7 percent to Rls. 205.2 trillion, was an indicator of this boom. Similarly, investment in new buildings in small and medium-sized cities amounted to Rls. 106.4 trillion, pointing to a significant growth of 104.9 percent. The same growth was observed in Tehran and other large cities ( 53 percent for Tehran and 65.6 percent for other large cities).

The remarkable growth of investment (particularly by private sector) in new buildings in urban areas in 2007/08 was largely due to the benign outlook for housing market and increase in construction costs. The total number of residential buildings constructed by private sector in

2007/08 came to 491.9 thousand with a total floor space of 60.7 million square meters. This shows 9.8 and 9.2 percent growth in number and floor space, respectively, compared with the previous year.

The positive growth in the number of construction permits is a leading indicator that signifies an improvement in the trend of construction, pointing to a benign outlook for investment in this sector in near future. In 2007/08, construction permits issued by municipalities increased by 21.1 and 50.3 percent to 209 thousand and 105.3 million square meters in terms of number and total floor space, respectively.

According to the Budget Law for 2007/08, a sum of Rls. 10.6 trillion was approved to be allocated to the acquisition of non-financial assets for the housing sector, urban and rural development, and supportive plans. Accordingly, based on the data released by the Treasury General, Rls. 14.5 trillion was paid by the government, indicating 36.1 percent excessrealization compared with the approved figure.

Outstanding facilities extended by banks and credit institutions to non-public housing sector rose by 23.5 percent to Rls. 284.9 trillion compared with end-2006/07. Meanwhile, based on the report released by Bank Maskan, in 2007/08, Rls. 68.3 trillion facilities (including profit receivables) were paid to 393.3 thousand applicants, showing respectively 6.7 and 9.1 percent decline compared with the previous year. This was mainly due to a fall in loan-to-value ratio following a surge in housing prices in 2006/07 and 2007/08 on the one hand and a halt in the implementation of the project of the
"extension of facilities with and without depositing" by Bank Maskan ${ }^{(1)}$ as of May 2007, on the other. This led to reducing the applicants' willingness to request for housing loans.

In 2007/08, land price index rose by 53.3 percent to 192.8 (2004/05-100). The highest growth of this index by 57.3 percent belonged to Tehran. Construction services price index reached 182.9, showing a remarkable increase of 30.5 percent. The highest growth in the subgroups of this index belonged to the "daily wage of unskilled construction worker", "wage paid for well-digging" and "daily wage of bricklayer". Moreover, WPI of metallic and non-metallic construction materials (base year=1997/98) increased by 22.4 and 14.1 percent, respectively.

## Transportation

In 2007/08, a sum of Rls. 16,589.3 billion was approved for the implementation of acquisition of non-financial assets projects in the transportation sector, up by 18.8 percent compared with the approved figure for the previous year. According to the Treasury General, the government spent Rls. 13,590.7 billion for the implementation of transportation sector projects, showing a rise of 11 percent compared with the previous year and a realization of 81.9 percent compared with the approved figure. The highest realization belonged to "applied research" and "air transport" by 572.0 and 535.9 percent, respectively.

[^1]In the review year, of total Rls. 47 trillion approved for the issuance of government participation papers, Rls. 6 trillion was related to the financing of transportation sector projects. In this year, 93 percent of the issued participation papers were sold for the financing of this sector.

Based on the report on Consumer Price Index in urban areas, transportation price index (base year=2004/05) grew by 13.5 percent at end-2007/08 compared with the previous year. The price index of travel expenses, with 21.4 percent rise, accounted for 45 percent of the increase in transportation price index. This increase was mainly due to the rise in the fares of taxis and intercity buses by 25.2 and 17.8 percent, respectively.

Moreover, in 2007/08, Producer Price Index for land and air transport sectors grew by 15.6 and 15.0 percent, respectively.

In the review year, the number of passengers carried by roads (public transport) reached

Figure 8. Number of carried passengers

455.6 million, showing 8.5 percent growth. Meanwhile, 485.0 million tons of goods (with or without bill of lading) were carried through roads, showing 10.8 percent increase compared with the previous year. Moreover, 4.5 million tons of goods (oil and non-oil) ${ }^{(1)}$ were transited through roads, showing a slight reduction of one percent compared with the performance of the previous year.

The length of the roads under the supervision of the Ministry of Road and Transportation (excluding rural roads) reached 73.5 thousand kilometers, showing a mere 1.2 percent growth. The length of freeways and highways increased by 12.3 and 13.0 percent to 1.6 and 6.2 thousand kilometers.

The average age of buses in service in the public transport system reached 13.0 years, showing 2.3 percent decline compared with the previous year. For minibuses, this index grew by 2.6 percent to 23.3 years, and for taxis it fell by 17.4 percent to 5.7 years.

[^2]The length of main railroads reached 8.7 thousand kilometers at end-2007/08. Railroads carried 24.5 million passengers, showing 14.6 percent rise compared with the previous year. Railway freight traffic went down by 6.0 percent to 31.0 million tons. Moreover, in the review year, 1.6 million tons of goods were transited through railroads, showing 6.7 percent rise compared with the previous year.

Total number of locomotives amounted to 635 , showing 2.6 percent increase. Furthermore, the ratio of "locomotives in service to total locomotives", with 0.3 percentage point increase, reached 56.9 percent.

Rail transport indices are still lower than international ones. At present, there exist 4.3 meters of railroad per one square kilometer in Iran, while the corresponding figure for Germany is 96.0, Japan 53.0, South Africa 16.4, and Turkey 11.2 meters. Moreover, there are only 20 railway wagons per one million persons in Iran, against 240 wagons in Germany, 230 in Japan, 40 in South Africa, and 25 in Turkey.

In the review year, 66.7 million tons of commercial and 40.3 million tons of oil goods
were carried through ports, showing 4.9 percent growth and 13.5 percent decline, respectively. Container operations in ports amounted to 1,963 thousand TEU ${ }^{(1)}$, up by 18.0 percent compared with the previous year. The number of passengers embarking and disembarking at ports increased by 5.2 percent to 3.9 million persons, of whom 58.3 percent were related to Gheshm Port.

The number of cargo ships, with over 1,000 tons capacity, grew by 1.2 percent compared with $2006 / 07$ and reached 9,266 . The number of cargo ships, with less than 1,000 tons capacity, increased by 14.4 percent to 23 thousand.

Total number of passengers departing and arriving at airports reached 31.8 million, showing 4.3 percent growth compared with the previous year and 115.2 percent realization compared with the target set in the $4^{\text {th }}$ Plan.

The amount of cargo carried by air (domestically and internationally) grew by 0.6 and 5.1 percent to 32.3 and 129 thousand tons, respectively. The number of national air fleet increased from 76 to 123, showing a remarkable growth of 61.8 percent.

PERFORMANCE OF KEY INDICES IN AIR TRANSPORT SECTOR

| Indices | Unit | Performance |  |  | Percentage change |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 2005/06 | 2006/07 | 2007/08 | 2006/07 | 2007/08 |
| Airport capacity for departures and arrivals | million persons | 62 | 67 | 72 | 8.1 | 7.5 |
| Replacement and development of national air fleet | aircraft | 78 | 76 | 123 | -2.6 | 61.8 |
| Air fleet productivity | hours | 7.48 | 7.36 | 7.26 | -1.6 | -1.4 |
| Share of non-public sector in domestic flights | percent | 36.0 | 39.7 | 43.9 |  |  |
| Share of non-public sector in international flights | percent | 47.3 | 49.8 | 53.1 |  |  |

(1) One TEU equals a 20 -foot container.

## Population and Employment

Based on the Statistical Center of Iran (SCI) estimates, Iran's total population was 71.5 million persons in 2007/08, of whom 49.6 million dwelled in urban and the remainder in rural areas.

Of the key objectives of the $4^{\text {th }}$ FYDP is to reduce unemployment rate to 8.4 percent by the end of the Plan (2009/10). According to the data drawn by the SCI in the "Labor Force Survey", unemployment rate stood at 10.5 percent in 2007/08, showing 0.8 percentage point decline compared with 2006/07. This rate was 12.5 percent for urban areas and 6.6 percent for rural areas, showing 0.9 and 0.5 percentage point fall, respectively, in urban and rural areas.

Unemployment rates among male and female population were 9.3 and 15.8 percent, respectively. This is indicative of a fall in the unemployment rate for both men and women. Of major challenges the labor market is facing with in the coming years are increased participation rate of women and the growing number of female university graduates.

A review of employment by economic sectors reveals that the services sector accounted for the highest share of employment while the lowest share was related to the agriculture sector. The shares of agriculture, manufacturing, and services sectors in employment were 22.8, 32.1, and 45.1 percent, respectively, in 2007/08. Comparison of these figures with those of the previous year indicates that the share of the agriculture sector fell and the share of the manufacturing sector went up. Implementation of
projects supporting the expansion of Small and Medium Enterprises (SMEs) in the two sectors of manufacturing and services led to the reduction of the share of the agriculture sector.

In 2007/08, in connection with the guidelines of the $4^{\text {th }}$ FYDP, the following measures were taken to reduce unemployment.

## Administered Funds

Based on Note 29 of the Budget Law for 2001/02 and Note 3 of the Budget Law for 2002/03, by the end of 2007/08, a sum of Rls. 12,708.2 billion was allocated to agent banks by the President Deputy for Strategic Planning and Control. Accordingly, these banks approved Rls. 16,699.8 billion projects (131.4 percent of government disbursed funds) and concluded Rls. 15,483.5 billion contracts ( 121.8 percent of disbursed funds). The total facilities paid by banks in this form amounted to Rls. 13,392.9 billion (105.4 percent of disbursed funds). In case the mentioned contracts become operational, 280,986 job oppor-
tunities will be created, constituting Rls. 47.7 million for each job opportunity. In 2007/08, the government did not disburse funds to agent banks for job creation projects under administered funds scheme. In this year, the administered funds allocated for job creation (final approved) projects decreased by Rls. 17.6 billion compared with end-2006/07.

## Payment of Subsidy on Profit and Commission Extended by Banks

The ceiling of the credits extended out of banks' domestic resources for the payment of subsidy on profit and commission was determined at Rls. 4,921.5 billion. According to the performance of the agent banks by end-2007/08, out of Rls. 801.4 billion administered funds deposited by the President Deputy for Strategic Planning and Control, the subsidy paid on projects (at Rls. 3,710.8 billion) amounted to Rls. 103.7 billion, which was 12.9 percent of the total deposited amount. Moreover, in case of the operation of these projects, 49,139 job opportunities will be created. Therefore, Rls. 75.6 million contracts were concluded for each job opportunity. In 2007/08, no amount has been paid into the agent banks' accounts for the payment of subsidy on profit and commission. The amount of paid subsidy was Rls. 20.9 billion.

## Allocation of Administered Funds and Credits

 Envisaged in "Technical and Credit Assistance to the Private and Cooperative Sectors"
## Program

In 2007/08, the ceiling for credits allocated out of banks' domestic resources increased by

Rls. 133.4 billion, compared with end-2006/07, to Rls. 7,929.3 billion. Meanwhile, President Deputy for Strategic Planning and Control deposited Rls. 1,181.3 billion into banks accounts, up by Rls. 255.3 billion compared with 2006/07 year-end. Therefore, by end-2007/08, a sum of Rls. 2,899 billion was allocated to projects in the form of concluded contracts. In case of the operation of these projects, 41,318 new job opportunities will be created, each enjoying Rls. 70.1 million investment.

## Facilities Extended by Banks to SMEs

Based on the executive by-law for supporting the expansion of SMEs, by the end of 2007/08, Rls. 573,913.8 billion projects were referred to banks, of which Rls. 263,149.0 billion were approved. Of total Rls. 197,961.5 billion concluded contracts, 45.3 percent were related to enterprises with less than 10 employees and 54.7 percent to enterprises with 10 to 49 employees. Total facilities paid out of this source amounted to Rls. 168,819.9 billion by the end of 2007/08.

Among various economic sectors, manufacturing and mining, with 49.2 percent, had the highest share in receiving these facilities. Comparing the balance of the mentioned account in 2007/08 with that of 2006/07 reveals that Rls. 247,889 billion projects were referred to banks, of which Rls. 128,407 billion were approved. In this year, Rls. 94,556 billion facilities were extended which will create 693,364 job opportunities in case of the operation of these projects.

## Government Budget and Finance ${ }^{(1)}$

Budget Law for 2007/08, as the third Budget Law during the course of the $4^{\text {th }}$ Plan (2005-10), was drawn up within the framework of the Twenty-Year Vision Plan, general policies of the government, the $4^{\text {th }}$ Plan, as well as sectoral, trans-sectoral and provincial Development Plan Documents of the country.

Government general budget sources and uses (approved) reached Rls. 639,451.7 billion. Total government budget sources include revenues, with a share of 43.4 percent, disposal of non-financial assets 27.5 percent, and disposal of financial assets 29.1 percent. Expenses, acquisition of non-financial assets, and acquisition of financial assets constituted respectively 62.5 , 28.8 , and 8.7 percent of the approved uses out of these sources.

According to the "Law on Amendment to the Budget Law for 2007/08" approved in December 2007, the government was authorized to raise expenses up to Rls. 36,300 billion, provided that the ceiling for general budget will not increase. Of this figure, Rls. 10,500 billion was financed through a replacement in the use of credits allocated for expenses, and Rls. 25,800 billion was appropriated through a reduction in the amount of credits for acquisition of nonfinancial assets.

With the approval of the mentioned Law, government general budget sources remained at the level stipulated in the Budget Law for 2007/08. On the uses side, Rls. 25,800 billion

[^3]was transferred from acquisition of non-financial assets to (current) expenses. Upon the mentioned amendment, share of expenses in total uses of budget reached 66.5 percent and that of acquisition of non-financial assets 24.8 percent. Total uses of government from the oil export revenues stipulated in the Budget Law for 2007/08 reached Rls. 334,993.9 billion, indicating a reduction of 10.2 percent compared with the approved figure for the previous year (including budget supplements).

Government general revenues amounted to Rls. 298,203.1 billion in the review year, showing 29 percent growth compared with the previous year and a 7.5 percent in excess of the approved figure. Share of tax revenues in total revenues declined from 65.6 percent in 2006/07 to 64.3 percent in the review year. Government tax revenues rose by 26.5 percent to Rls. 191,815.3 billion in 2007/08, compared with the previous year, representing 97.2 percent realization in comparison with the approved figure. Direct tax revenues faced an excess-realization of 1.2 percent and indirect taxes, an under-realization of 9.6 percent in this year. The highest share of tax revenues ( 65.9 percent) belonged to direct taxes, as before.

Share of tax revenues out of government general revenues decreased during 2003-08. This share reached 64.3 percent in 2007/08, against 82.6 percent in 2003/04. Therefore, government reliance on tax revenues to cover current expenses declined over the past five years.

Figure 12. Government per capita revenues, tax revenues and current expenses at constant 2004/05 prices

In this year, other government revenues grew by 33.8 percent to Rls. 106,387.8 billion, indicating 32.6 percent excess-realization compared with the approved figure.

Revenues received from disposal of nonfinancial assets amounted to Rls. 174,791.8 billion, down by 4.4 percent compared with the previous year, showing 99.5 percent realization in comparison with the approved figure. Of total disposal of non-financial assets, Rls. 173,519.1 and $1,272.7$ billion were related to oil export revenues, and sale of movable and immovable assets, respectively, indicating a fall of 4.6 per-
cent and a rise of 38.9 percent compared with the respective figures of the previous year. However, receipts from disposal of movable and immovable assets faced 61.1 percent underrealization as compared with the approved figure. Receipts from sale of crude oil reached Rls. 139,699.1 billion, up by 5.9 percent against the previous year.

Disposal of financial assets, including domestic and foreign financing, declined by 2.8 percent to Rls. 156,614 billion compared with the preceding year, showing 84.1 percent realization as compared with the approved figure. The 15.9 percent under-realization in disposal of financial assets was mainly due to 69 percent underrealization in foreign financing and 42.8 percent under-realization in privatization of public corporations. In the review year, the withdrawal from the OSF amounted to Rls. 106,994.3 billion, down by 25 percent in comparison with the previous year. Of total sources for disposal of financial assets, 68.3 percent was financed through withdrawal from the OSF.

In the composition of the government budget sources, 53.4 percent was financed through oil, indicating a reduction of 11.7 percentage points against the corresponding figure of the preceding year by taking the Budget Supplements into account. These sources comprised crude oil export revenues, tax on oil performance, provisional dividend of government share in value of crude oil production, and the government withdrawal from the OSF.

In the review year, the government expenses rose to Rls. 421,334.1 billion, representing 1.3 percent increase against the previous year, and 99.1 percent realization compared with the
approved figure. Meanwhile, national government expenses declined by 0.9 percent, and provincial expenses grew by 7.9 percent, constituting respectively 72.6 and 27.4 percent of government expenses.

Government paid a total of Rls. 147,715.8 billion for the acquisition of non-financial assets, indicating 1.5 percent growth compared with the year before and an under-realization of 6.9 percent compared with the approved figure. Of total payments by the government for the acquisition of non-financial assets, 76.7 percent were in the form of national and 23.3 percent in the form of provincial expenses.

Therefore, the government operating balance ran a deficit of Rls. 123,131 billion, indicating a reduction of 33.3 percent against Rls. 184,657.3 billion deficit in the year before. Net disposal of non-financial assets amounted to Rls. 27,076.1 billion, down by 27.3 percent compared with the previous year. Government operating and non-financial balance, due to operating balance deficit and surplus in net disposal of non-financial assets, posted Rls. 96,054.9 billion deficit, showing a decline of 34.8 percent compared with the previous year deficit of Rls. 147,431.2 billion. This was largely attributable to a decrease in the operating balance deficit. Operating and non-financial balance deficit
was mainly financed through withdrawals from the OSF.

Ratio of government revenues to GDP rose slightly from 11.3 percent in 2006/07 to 11.4 percent in the review year. In contrast, ratio of expenses to the same variable decreased to 16.1 percent in 2007/08 from 20.4 percent in the year before. Ratio of acquisition of non-financial assets to GDP reached 5.6 percent in 2007/08, against 7.1 percent in the previous year. Ratio of operating balance deficit to the mentioned variable fell from 9.1 percent in 2006/07 to 4.7 percent in 2007/08. Ratio of operating and nonfinancial balance (total budget deficit) to GDP also declined to 3.7 percent in 2007/08 against 7.2 percent in 2006/07, representing a reduction of 3.5 percentage points. The mentioned trends reveal adoption of contractionary policies by the government in 2007/08.

RATIO OF SELECTED BUDGET ITEMS TO NOMINAL GDP (percent)

|  | $2003 / 04$ | $2004 / 05$ | $2005 / 06$ | $2006 / 07$ | $2007 / 08$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Revenues <br> Expenses <br> (current) | 7.2 | 7.5 | 11.9 | 11.3 | 11.4 |
| Acquisition of <br> non-financial <br> assets | 6.7 | 16.7 | 19.6 | 20.4 | 16.1 |
| Operating <br> balance | -9.1 | -9.3 | 7.0 | 7.1 | 5.6 |
| Operating and <br> non-financial <br> balance | -4.0 | -3.6 | -3.6 | -9.1 | -4.7 |

GOVERNMENT PER CAPITA REVENUES AND EXPENSES AT CONSTANT 2004/05 PRICES ${ }^{\text {(1) }}$

|  | $2003 / 04$ | $2004 / 05$ | $2005 / 06$ | $2006 / 07$ | $2007 / 08$ | Average growth <br> $(2003-08)$ |

| Expenses (current) |  |  |  |  | $\mathbf{6 . 9}$ |  |

(1) The CPI has been used to adjust the price change effect.

Despite a rise of 7.3 percent in government per capita revenues (at constant prices), the government per capita expenses (at constant prices) declined by 15.7 percent.

In total, in the Budget Law for 2007/08, the government's attempts to control growth of expenses together with a justifiable realization of acquisition of non-financial assets, while preventing increase in the ceiling of sources and uses, is praiseworthy.

Figure 13. Ratio of operating and operating and non-financial balance deficit to GDP

## Balance of Payments

Positive developments in the global crude oil market and upward trend of non-oil exports improved the external sector significantly. Based on the preliminary data, total foreign exchange receipts from export of goods, which were largely related to oil and gas export, reached $\$ 97,401$ million in 2007/08. Total oil and gas export revenues (including crude oil, natural gas, oil products, and gas condensates) grew by 31.9 percent to $\$ 81,764$ million. Non-oil exports (customs and non-customs) also rose by 11.3 percent to $\$ 15,637$ million.

According to the data released by Iran's Customs Administration, 32,118 thousand tons of
goods worth $\$ 15,312$ million were exported in the review year, indicating respectively 15.7 and 17.8 percent rise in terms of weight and value compared with the previous year. Total non-oil exports (customs and non-customs) grew by 11.3 percent to $\$ 15,637$ million in 2007/08 as compared with the year before. Total value of imports (through customs) reached \$48,439 million, up by 16.1 percent compared with the figure for 2006/07. Weight of goods imported amounted to 41,696 thousand tons, showing a fall of 4.1 percent against the year before. Total value of imports, including non-customs imports, reached $\$ 56,582$ million in 2007/08, up by 13.1 percent compared with the preceding year. It should be mentioned that the difference between customs imports and total imports is related to adjustment on customs data for full coverage of imports.

Trade balance, therefore, posted a surplus of $\$ 40,819$ million in the review year. This, together with the $\$ 7,199$ million deficit in foreign services balance and the $\$ 461$ million surplus in the transfers account, resulted in the $\$ 34,081$ million surplus in the current account of balance of payments. However, non-oil current

account ran a deficit of $\$ 47,683$ million, up by 14.6 percent compared with the previous year deficit of $\$ 41,609$ million. This indicates the greater role of oil sector in the external sector of the Iranian economy. Thus, total non-oil exports could meet 3.3 months of imports requirements. In 2006/07, non-oil exports met almost four months of imports requirements.

Capital account (net) ran $\$ 12,357$ million deficit, indicating a noticeable growth as compared with $\$ 4,383$ million deficit of the previous year. This was largely due to the $\$ 10,804$ million deficit of the short-term account, which in turn was owing to an increase in banks' foreign assets and the commercial credits allocated for oil exports. Long-term account ran a $\$ 1,554$ million deficit, largely owing to repayment of debts from buy-back contracts, repurchase of Eurobonds, and repayment of debts resulting from project finance.

Foreign exchange obligations increased by 23.9 percent from $\$ 45,338$ million in 2006/07 year-end to $\$ 56,184$ million at end-2007/08. Notable rise in the ceiling of foreign exchange obligations at end-2007/08, after a long period of stability and slight fluctuation, was largely owing to greater coverage of data in recent years.

Outstanding amount of actual obligations at end-2007/08 reached $\$ 28,647$ million, up by 21.8 percent compared with the previous yearend. Contingent foreign exchange obligations, with a 26.2 percent increase, reached $\$ 27,537$ million, against $\$ 21,825$ million at end-2006/07.

Balance of the OSF grew by 89.1 percent to $\$ 38,871$ million at end-2007/08. Of this amount, $\$ 23,175$ million was in the form of cash and $\$ 15,696$ million in the form of claims.

The ratio of imports to GDP, which showed an upward trend during 2002-04 reversed since 2005. This ratio, with 2.8 percentage points reduction, equaled 19.8 percent in 2007/08, against 22.6 percent in 2006/07. Moreover, the ratio of exports (including oil) to the mentioned variable, despite its constant growth during 2002-05, declined gradually in the past two years. The ratio of non-oil export to GDP, despite its volatile trend in recent years, stood at 5.5 percent in 2007/08. This indicates 0.8 percentage point reduction compared with the year before. Therefore, runup in international crude oil prices as well as a surge in the value of oil and gas exports led to a remarkable surplus in the current account balance during the past three years. The ratio of current

RATIO OF IMPORTS, NET EXPORTS AND CURRENT ACCOUNT BALANCE TO GDP

|  | $2003 / 04$ | $2004 / 05$ | $2005 / 06$ | $2006 / 07$ | $2007 / 08$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Imports | 22.4 | 24.1 | 23.0 | 22.6 | 19.8 |
| Exports | 25.7 | 27.6 | 34.3 | 34.3 | 34.1 |
| Current account <br> balance | 0.6 | 0.9 | 8.9 | 9.2 | 11.9 |
| Non-oil exports | 5.0 | 4.7 | 5.6 | 6.3 | 5.5 |

account balance to GDP advanced to 11.9 percent, showing 2.7 percentage points rise compared with the preceding year.

## Money and Banking

Liquidity growth stood at 27.7 percent at end2007/08, indicating 11.7 percentage points reduction against the previous year-end. Among the factors affecting liquidity growth, net foreign and domestic assets of the banking system constituted respectively 3.6 and 24.1 percentage points of liquidity growth.

Among the constituents of net domestic assets, claims on non-public sector (excluding profit and revenue receivables), with 31.3 percent, held the highest share in liquidity growth, indicating a fall of 3.6 percentage points as compared with the previous year-end. Moreover, net claims on government, public corporations and organizations, and other items (net) had decreasing effects of $0.9,0.6$, and 5.7 percentage points, respectively, on liquidity growth. The negative share of government indebtedness to the banking system (net) solely relates to the rise in government deposits with banks by 18.8 percent against the preceding year-end, not to the repayment of its debts to the banking system.

Monetary base surged by 30.5 percent, representing a rise of 3.6 percentage points against the 26.9 percent rise of the year before. CBI's claims on banks, with 21 percentage points growth compared with the previous year, had the highest share in monetary base growth by 29.6 percentage points. The noticeable rise in CBI's claims on banks was mainly due to banks' overdraft from the Central Bank in the review year.

Net foreign assets of the CBI had the highest share ( 51.5 percentage points) in monetary base growth in 2006/07, which decreased to 24.1 percentage points in 2007/08. Government obligation to implement the approved budget as well as the interbank market capability in absorbing the foreign exchange supplied by the government were the main driving forces behind the fall in the share of net foreign assets in monetary base. Therefore, in 2007/08, the highest share in monetary base growth was related to rise in banks' indebtedness rather than rise in foreign assets.

Other assets (including CBI capital account) and net claims of the Central Bank on public sector by 13.7 and 9.5 percentage points, respectively, had the highest decreasing effects on the monetary base.

The share of money in liquidity grew slightly to 32.7 percent at end-2007/08 as compared with 32.3 percent of the previous year. Among the main constituents of money, share of notes and coins with the public to liquidity edged up by 0.1 percentage point as compared with the previous year-end.

Figure 16. Major economic variables

Money multiplier declined by 2.2 percent to 4.488 in 2007/08 year-end against the same period previous year, indicating a noticeable decline as compared with the 9.8 percent growth in the year before. This reduction was mainly due to an increase in the ratio of excess reserves to total deposits (largely owing to the rise in foreign exchange demand and investment deposits of banks with the Central Bank), which rose by 15.6 percent against the same figure for the previous year-end.

Balance of non-public sector deposits with banks and credit institutions grew by 27.6 percent (Rls. 337.6 trillion) to Rls. 1,560.4 trillion in 2007/08 year-end. Of this growth, 30.9 percent was related to private banks and credit institutions. Share of these banks and institutions out of total non-public sector deposits was 19 percent at end-2007/08, showing a rise of 3.3 percentage points as compared with the previous year. This increase was largely attributable to the high (provisional) deposit rates of private banks compared with that of public banks, rise in public confidence in private banks, and low attractiveness of investment in other markets such as the Stock Exchange.

The ratio of overdue claims and nonperforming loans extended to public and nonpublic sectors to total facilities extended by banks and credit institutions reached 11.4
percent in 2007/08 ${ }^{(1)}$ against 13.7 percent in 2006/07.

The ratio of change in the outstanding claims of the banking system on non-public sector to GDP decreased from 17.7 percent in 2006/07 to 16.7 percent in the review year. Of note, the mentioned ratio had an upward trend in 2006/07 as compared with the year before. The ratio of change in the balance of non-public sector deposits to GDP declined from 17.3 percent

## RATIO OF CHANGE IN BALANCE OF NONPUBLIC SECTOR DEPOSITS AND OUTSTANDING DEBTS OF NONPUBLIC SECTOR TO GDP (percent)

|  | $2003 / 04$ | 2004/05 | 2005/06 | 2006/07 | 2007/08 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Change in balance <br> of non-public <br> sector deposits | 9.6 | 11.1 | 13.6 | 17.3 | 12.9 |
| Change in out- <br> standing debts <br> of non-public <br> sector | 11.7 | 12.3 | 14.2 | 17.7 | 16.7 |

(1) According to the new classification, in 2007/08, overdue claims and non-performing loans consisted of total claims on public and non-public sectors and extended facilities refer to facilities extended to both public and non-public sectors. However, in the calculation of overdue claims and nonperforming loans in 2006/07, total claims on non-public sector and the facilities extended to this sector were taken into account.
in 2006/07 to 12.9 percent in the review year. These reductions revealed a slowdown in liquidity growth in comparison with the past two years.

## Monetary and Credit Policies

Based on Article 10, the $4^{\text {th }}$ FYDP, and Article 20, the Law for Usury Free Banking, the MCC set the minimum lending rate on the facilities extended by public banks for transaction contracts at 12 percent for all economic sectors in 2007/08.

Upon reduction of public banks' lending rates during 2004-08, the minimum expected lending rate of private banks was adjusted in the review year. According to the MCC approval, the minimum expected lending rate on the facilities extended by private banks and credit institutions for transaction contracts was set at 13 percent for all economic sectors.

The deposit rates (provisional) of public banks were within a range of 7 (for short-term deposits) to 16 percent (for five-year investment deposits) as the previous year.

Based on the recommendation of the MCC, the Parliament approved issuance of participation papers by the CBI worth Rls. 40 trillion at the profit rate (provisional) of 15.5 percent. These papers were tax-exempt with a oneyear maturity from the date of issuance.

## Payment System

The financial sector in Iran witnessed great developments in the payment system in 2007/08. The Central Bank developed the Real Time Gross Settlement System (SATNA) as the main
center for settlement of Iranian banks' transactions in rial. Upon implementation of the first and second phases of this system in 2006/07, real time settlement through the interbank information transfer network (SHETAB) and interbank clearing house was started in the review year. Since 2007/08, bank-to-bank and customer-to-customer payments were also settled through SATNA. The Retail Funds Transfer System (SAHAB), launched at end-2006/07 for real time transfer of a large volume of payments of relatively small value, was further developed in 2007/08. Moreover, there are further plans to connect Iran's SHETAB to information transfer networks of other countries.

## Notes and Coins

Cash (notes and coins with the public) is still the predominant payment instrument. Notes and coins with the public rose by 30 percent from Rls. 61,452 billion in 2006/07 year-end to Rls. 79,909 billion at end-2007/08. However, the ratio of notes and coins with the public to nominal GDP remained virtually unchanged at 2006/07 level of almost 3 percent ${ }^{(1)}$. Moreover, the share of notes and coins with the public in liquidity grew by less than 0.1 percentage point compared with 2006/07 year-end, to 4.9 percent.

## Interbank Clearing House

Although payment system in Iran is undergoing great developments upon establishment of SATNA, financial transactions are mostly channeled through Interbank Clearing House. In

[^4]total, more than 915 million checks valued at Rls. 8,042 trillion were exchanged in the Clearing Houses in the review year, which led to netting of Rls. 1,056 trillion.

The low denomination notes call for an extensive use of banking checks in lieu of notes in most financial transactions. In 2007/08, roughly 656 million Iran-checks worth Rls. 636 trillion were collected by the Clearing House. The respective figures for the previous year were 351 million Iran-checks valued at Rls. 283 trillion. This indicates a rise of 124.4 percent in total transactions settled by Iran-checks in the review year, less than its growth (149.6 percent) in 2006/07. Full operation of SATNA and electronic transfer systems together with the widespread use of bank cards is expected to lessen the demand for Iran-checks in interbank transactions in the future.

Ordinary checks are usually recognized as interbank coded checks and personal checks excluding Iran-Checks. The amount of ordinary checks delivered to the Interbank Clearing House in terms of volume and value rose by 2.6 and 40.8 percent, respectively, in 2007/08. Thus, total transactions settled through ordinary checks in terms of volume and value reached 259 million and Rls. 7,406 trillion in the review year. Growth rate of total transactions settled through Iranchecks, in terms of volume, rose from 16.5 percent in 2006/07 to 86.9 percent in 2007/08;
while in terms of value, they declined to 124.4 percent in 2007/08, against 149.6 percent in the previous year. Growth rate of total transactions settled through ordinary checks, in terms of volume and value, declined from respectively 13.5 and 42.6 percent in $2006 / 07$ to 2.6 and 40.8 percent in the review year. These trends reveal the rise in the use of checks for large value payments, and Iran-checks and electronic payment instruments for payments of small value. Considering the small share of electronic payments in transactions, the rise in the value of transactions is justifiable as compared with the liquidity growth.

## Expansion of Electronic Payment Instruments

The upward trend of issuance of electronic cards continued in 2007/08. The number of cards issued by the banking system grew by 64.7 percent to 38.6 million. Among these cards, the growth of debit cards was 78 percent ( 30.2 million), prepaid cards 21 percent ( 8.2 million), and credit cards only one percent ( 264 thousand). The number of ATMs rose by 32.8 percent to 9,917 in the review year. This shows a

| Total | 603,772 | 915,473 | 51.6 | 5,542,426 | 8,041,761 | 45.1 |

moderate growth when compared with the 121.6 percent growth in the number of POSs in 2007/08. Total number of POSs reached 427,082 in this year; however, the ratio of POSs to population in Iran is much less than this ratio in other countries ${ }^{(1)}$. Further expansion of the POSs is projected, although its growth is expected to slow down in the future.

## Development of Electronic Transactions

In 2007/08, in line with advancements in electronic payments, electronic transactions increased. The number of interbank electronic transactions processed in SHETAB through ATMs, POSs, and pin pads grew respectively by 43.3, 178.2, and 67.8 percent ${ }^{(2)}$, in the last nine months of 2007/08 compared with the same period last year. This brought the total settled transactions to 678 million and Rls. 435,512 billion in the
review year. The number of electronic transactions processed through ATMs still holds the lion's share by 90.3 percent. However, it is expected that with the extensive use of credit cards and POSs throughout the country, the number of transactions through POSs rises and the use of notes decreases.

## SHETAB

The full operation of interbank information transfer network is still in its infancy, although five years have passed since its operation. The number of interbank electronic transactions processed in SHETAB through ATMs and POSs grew respectively by 56.0 and 208.7 percent to 359,134 and 22,050 thousand. This raised the total settled transactions to Rls. 17,766 billion in 2007/08, indicating 67.4 percent growth compared with the previous year.

| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2006/07 | 2007/08 |  | 2006/07 | 2007/08 |  |
| Total transactions through SHETAB | 237,324 | 381,184 | 60.6 | 10,616 | 17,766 | 67.4 |
| ATMs | 230,181 | 359,134 | 56.0 | .. | .. | $\theta$ |
| POSs | 7,143 | 22,050 | 208.7 | .. | .. | $\theta$ |

(1) In 2007, the number of POSs per one million persons averaged 15,862 for member countries of the Payment Systems Committee and the Bank for International Settlement (BIS).
(2) Data are prepared on a monthly basis since June 2006; therefore, figures for 2007/08 are not comparable with the previous year.

## Development of SAHAB

The Retail Funds Transfer System (SAHAB) helped transfer of up to Rls. 10 million through ATMs as well as on-line and real time transfer of Rls. 50 million through banks round-the-clock.

SAHAB was put into limited operation in 2006/07 by electronic transfer of funds from one bank card to another through ATMs, and was developed in the review year through connection of 13 banks to this system, permitting transfer of funds via their ATMs and pin pads. Banks Sepah, Tejarat, Maskan, and Refah could not render these services to their customers till end-2007/08.

The service offered by this system was welcomed by the public, thus raising the number of transactions processed through ATMs to 2,061 thousand. Moreover, thanks to the electronic transfer of funds through 13 banks connected to SAHAB, 31,938 thousand transactions were settled by pin pads in all banks in 2007/08. It is expected that with the extensive use of this service in the banking network, the alternative means of transactions such as the coded checks, Iran-Checks, and notes recede from the Iranian payment system in the coming years.

## SATNA

Since operation of the Real Time Gross Settlement System (SATNA) till end-2006/07, a total of 11 thousand transactions valued at Rls. 650,411 billion were settled through this system. Following putting into operation of subsequent phases, which were observer of bank-tobank and customer-to-customer payments through this system, Iran's payment system witnessed
great developments in terms of speed and security of banking transactions. Therefore, total transactions processed through SATNA, in terms of volume and value, reached 24,445 and Rls. 1,564,238 billion.

VOLUME AND VALUE OF TRANSACTIONS PROCESSED THROUGH SATNA IN 2007/08

|  | Volume | Value <br> (billion rials) |
| :--- | :---: | :---: |
| Bank-to-bank | 8,416 | 435,143 |

| Total | $\mathbf{2 4 , 4 4 5}$ | $\mathbf{1 , 5 6 4 , 2 3 8}$ |

## Capital Market

## Stock Exchange

In 2007/08, inappropriate business climate, regional uncertainties and certain public policies regarding price administration and short-term boom in real estate market gravely affected investors' decision in the stock market.

In the review year, the "TEPIX" rose by 2.7 percent, "financial index" 0.5 percent, "industrial index" 2.8 percent, "price and dividend index" 17.6 percent, and "cash dividend index" 14.5 percent. On the other hand, " 50 top companies index" fell by 19.6 percent. The turnover ratio ${ }^{(1)}$ reached 17.1 percent in 2007/08 year-end, up from 15.4 percent at end-2006/07.

Shares and rights traded in 2007/08 indicated 48.3 and 31.3 percent increase in the number and value of trading, respectively, compared
(1) It is the ratio of trading value to average current value of shares.
with the previous year. Meanwhile, market capitalization went up by 17.0 percent, compared with the previous year. Rise in the number and value of traded shares as well as market capitalization is mainly attributable to the transfer of large public firms' shares to the private sector.

In the review year, $8,076.8$ million shares of public corporations and institutions, worth Rls. 21,730 billion, were offered by the Privatization Organization as well as specialized holding companies. This shows a growth of about 180 percent in terms of number and value ${ }^{(1)}$.

Figure 18. Annual changes in share price and dividend indices

In January 2008, the Executive Bill on the General Policies of Article 44 of the Constitution was approved by the Parliament. Pursuant to the implementation of this Bill, the privatization plan appears to follow an upward trend in the coming years.

Meanwhile, in the review year, the Securities and Exchange High Council approved two new financial instruments namely, Ijara (renting)-

[^5]based securities (Ijara-Sukuk) and its executive regulations, as well as futures contracts.

## Participation Papers

According to the Budget Law for 2007/08, the government was authorized to issue participation papers worth Rls. 47 trillion. Of this amount, Rls. 6 trillion were in the form of gov-ernmental-budgetary ${ }^{(2)}$ and Rls. 41 trillion, governmental - non-budgetary ${ }^{(3)}$ participation papers. Of total governmental-non-budgetary participation papers, Rls. 20 trillion were related to the implementation of acquisition of profitable and non-financial assets projects of public corporations and institutions and Rls. 21 trillion to the renovation of old buildings and extension of facilities for the construction of housing.

In 2007/08, a sum of Rls. 29,850 billion participation papers were issued by the government, indicating 63.5 percent realization compared with the approved figure. Of this amount, Rls. 20,258.4 billion were sold, showing 67.9 and 43.1 percent realization compared with the issued amount and approved figure, respectively.

The ceiling for the issuance of Central Bank's participation papers was set at Rls. 40 trillion. The CBI issued Rls. 40,750 billion participation papers, of which Rls. 22,763.3 billion ( 55.9 percent) were sold, indicating 56.9 percent realization compared with the approved figure. High yield in competitive assets' markets (especially land and housing) and the low real profit rate of these papers are largely responsible

[^6]for the under-realization of the targets set for the sale of CBI participation papers.

The ceiling for the issuance of corporations' participation papers was set at Rls. 11 trillion, including Rls. 8 trillion as subject of Article 4, Law on Issuance of Participation Papers, and Rls. 3 trillion as subject of Article 17, Law on Facilitation of Industries Renovation. In this respect, a sum of Rls. 3,200 billion participation papers were issued by corporations, of which Rls. 2,300.4 billion were sold.

At end-2007/08, total outstanding of unmatured participation papers with the banking system grew by 22.1 percent to Rls. 33,966 billion, as compared with the previous year-end. Total outstanding of unmatured participation papers issued by the government and public corporations and institutions with the banking system rose by 78.1 and 109.1 percent to Rls. 13,283 and 14,178 billion, respectively. Moreover, of participation papers held with the banking system, Rls. 3,468 billion (10.2 percent) belonged to the Central Bank and Rls. 3,037 billion (8.9 percent) to non-public sector, showing 71.4 percent decline and 108.2 percent increase, compared with the previous year-end.

## Price Trends

The consumer price index of goods and services advanced 18.4 percent (base year_2004/05), indicating 6.5 percentage points increase compared with the 11.9 percent growth of the previous year. Among the special groups, the price index of "goods", with 17.4 percent increase compared with the previous year, accounted for 52 percent of the rise in the general index. The main group of "food and beverages", with
21.7 percent rise compared with the year before, raised the general index by 34 percent. Among selected minor groups, "rental equivalence of owner-occupied houses" had the greatest contribution to raising the general index by 22.5 percent. Meanwhile, among minor groups, the highest growth rate of 33.4 percent belonged to "fats and oils ".

In 2007/08, wholesale price index increased by 14.9 percent on average. Among major groups, "domestically produced and consumed goods", with 15.2 percent growth, had a share of 76.7 percent in the rise of the general index. The price indices of "imported goods" and "exported goods" advanced 12.9 and 17.0 percent, respectively, year-on-year basis.

The producer price index rose by 16.8 percent compared with the previous year. Among the special groups, "agriculture, animal husbandry, forestry, and fishing" by 19.1 percent, "mining and quarrying, manufacturing, and electricity, gas and water supply" by 14.8 percent, and "services" by 17.6 percent growth, accounted for $26.7,36.1$, and 37.2 percent of the increase in the general index, respectively.

(1) Components may not sum to total because of imports.
(2) Includes residential, commercial, industrial, power plants and refineries consumption.
(3) Excludes gas injected into oil wells.

(1) Includes all contracts except direct investment and legal partnership.
(2) It also includes Note 55, the $3^{\text {rd }}$ Plan Law.
(3) Includes payments in the form of Article 60, $3^{\text {rd }}$ Plan Law and Article 1, $4^{\text {th }}$ Plan Law.

- (4) Includes payment to Industry and Mine Leasing Company, reconstruction of damaged industries in Bam, and miscellaneous.
